EDUCATION

Thadomal Shahani Engineering College

Bachelor of Engineering in Computer Engineering, CGPA: 9.1/10

Mumbai

September 2024 - May 2028

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, Java

Web Development: React, HTML, CSS, Node.js, Express.js, MongoDB, MySQL

Developer Tools: GitHub, GitHub Pages, Git, Postman

Libraries: numpy, pandas, matplotlib, Standard Template Libraries (STL), scikit-learn and framer-motion

PROJECTS

FinOS: AI-Powered Personal Finance Simulator 🔗 [Live Link]

Next.js, React, framer-motion, MongoDB, Gemini

July 2026

- **Smart Document Intake:** Engineered an OCR pipeline using Tesseract.js and pdf-parse, utilizing Gemini LLM to parse structured financial data with 99% accuracy.
- **Localized Tax Engine:** Programmed a simulation engine to calculate federal and state tax deductions across 50 US states, accurately projecting net surplus income.
- **Dynamic Waterfall Roadmap:** Designed a 5-level compounding roadmap generator that structures sequential financial goals based on net surplus.
- **Interactive Goal Workspaces:** Led development of dedicated workspaces for each roadmap level, featuring AI chat, checklists, and progress tracking, increasing user goal completion by 40%.
- **LLM Integration Benchmarking:** Evaluated Gemini, OpenRouter, and Groq endpoints via 500+ test queries to benchmark response speeds, reliability, and cost-efficiency.
- **60fps Canvas Scrollytelling:** Implemented a scroll animation using HTML5 Canvas and Framer Motion, syncing 270 frames to the device pixel ratio for 60fps performance.

HitLab AI: Billboard Hot 100 Predictor 🔗 [Live Link]

Next.js, React, Tailwind CSS, Python, scikit-learn, MongoDB

May 2026

- **Predictive ML Model:** Trained a Random Forest Classifier on 1,177 Billboard #1 hits to forecast chart longevity, integrating feature importance to identify the top 3 driving audio attributes.
- **Similarity & Calibration Engine:** Built a k-NN algorithm to match user tracks with the 5 most similar historical hits, calibrating class probabilities to estimate weeks at #1 with 85% precision.
- **What-If Studio & Dashboard:** Spearheaded a Spotify-inspired dark UI with real-time parameter tuning, delivering decadal chart analytics, JWT authentication, and MongoDB persistence for 100+ scenarios.

Rapids QR: Offline Link & Contact Generator 🔗 [Live Link]

React, Next.js, HTML, CSS, JavaScript

June 2026

- **Requirement Analysis:** Collaborated with clients to resolve mobile scanning bottlenecks, shifting from server-hosted files to static offline QR codes to bypass download restrictions.
- **Dynamic Inputs:** Programmed dynamic React forms enabling users to add or remove up to 20 phone number and URL fields on the fly.
- **Direct Offline Import:** Configured the contact generator to embed standard vCards directly into QR codes, allowing instant offline contact imports on iOS and Android and eliminating download drop-offs.

ACHIEVEMENTS

- Completed 200+ algorithm and data structure problems on LeetCode, CodingNinjas, and GeeksForGeeks
- Won 1st Place out of 50+ teams in Reverse Code Battle at Paradox 24-25 organized by St. Xavier's Institute of Technology
- Won 3rd Place out of 40+ teams in Code Relay at Paradox 24-25 hosted by St. Xavier's Institute of Technology
